PROJECTS

Codemate - Real-Time Collaborative Coding Platform

Duration: July 2024 - Present

Role: Co-Lead Developer

Project Overview:

Codemate is a platform where multiple users can code together in real-time. The goal was to make remote coding easier and more interactive by adding live coding and Discussion Room.

My Contributions:

Co-led the development, focusing on real-time code sharing and video communication.

Helped build the backend with Express.js and Node.js for managing real-time interactions.

Worked on integrating the JDoodle API for instant code execution and error checking.

Assisted in creating a responsive frontend using React.js to ensure a smooth user experience.

Technologies : React.js, Socket.io, Express.js, Node.js, JDoodle API
